

ANSTCO

INFINITE SURFACE

Asian Nanostructures Technology Company (ANSTCO) is the Iranian leading knowledge-based company in design and fabrication of electrospinning machinery and production of a wide variety of organic and inorganic nanofibers and nanoparticles through electrospinning and electrospaying processes. Fabricating various types of electrospinning machinery and nanofibrous products in large scales, ANSTCO paves the way for academic and industrial development in nanotechnology. The proposed technology provides the supporting means for innovations and inventions at various levels in nanotechnology fields. Offering a great variety of nano-scaled products, ANSTCO makes the nanotechnology applications possible.

Development of
nanofibrous
materials and products

R&D services
in the field of electrospinning
and nanofibers

Research and development
of industrial electrospinning machinery

Water purification Self-cleaning materials

Air and liquid filtration

Environment

Catalysts & photocatalysts

Superabsorbent materials

Molecular Filtration

Chemical protective clothing

Nanofiber reinforced composites

Defense & Security

Carbon nanofibers

Biological protective clothing

Medical textile

Enzyme immobilization

Healthcare

Biosensors / immunoassays

Hygiene and cosmetics

Drug delivery

Regenerative medicine

Wound dressing

EMI shielding

Fuel cells and batteries

Energy & Electronics

Transistors

Supercapacitors

Solar cell panels

Hydrogen storage

Optoelectronic devices

ANSTCO
